Roles for CPE

Roles	Performance Expectations
Charge	Can read the algorithm, knowledgeable, confident, assertive
Medications	Pushes “right” meds, calls them out, flushes after each administration
Airway	Correct rate, appropriate volume, switches in a timely manner
Compressions	Correct rate, allows chest recoil, switches in a timely manner
Scribe	Records accurate information, at the very least records IV pushes, rhythms, defib, update the charge & medication
Runner	Locates requested items in a timely manner, inform the physician & family, switches out with compressor when fatigued
Whole Team	Will all work together to perform post-code care or transfer to the ICU
