Nursing has been in my family for many years, my grandmother was a nurse, my mother is a nurse and it's been an amazing and rewarding career for myself and my family this far. Nursing is a career that provides meaningful work, career growth opportunities, diverse specialty options, high earning potential, job stability, schedule flexibility, and more. Growing in my nursing career is what I am ready to do now because I want to grow in L&D and possibly ICU. I am so thankful for this opportunity, and pray we all do great and have a blessed school year.
