

Modified CPE Key Points

AIDET: Acknowledge, Introduce, Duration, Explanation, and Thank you (done during interaction with the patient)

Universal competencies:

- Knock before entering the patient's room.
- Introduce yourself.
- Hand hygiene
- ID patient & verify allergies.
- Communicate with the patient.
- **Maintain asepsis!**
- **Safety**

Sterile Procedure: (You will have two self-corrects)

- Hand hygiene and clean the bedside table for the sterile procedure.
- **Maintain asepsis!**
- Foley insertion
- Central Venous line dressing change (verbalize "I will change the needleless ports")

Teaching:

- The procedure
- The assessment
- At the end of CPE **verbalize** documentation of the procedure and response to the procedure

Safety: before exiting the room

- Make sure the bed is at its lowest position.
- HOB rails up x 2
- Bed locked
- Call light within reach
- Call for help for assistance.
- **4 Ps:** Pain, potty, position, and personal possessions (done when you finish, before exiting the patient room)
