Instructional Module 6
Obstetrics Community Clinical Experience

Community Site: STD

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?
I saw alot of people, specifically females, needing to get tested for STD's. I observed pelvic exams and wet prep tests.
2. What was the best/most interesting part of the experience?
The lab showing me what Tric sti looks like under the microscope. Also getting to practice blood draws.
3. Is a community nursing position something that you would consider working in? Why or why not?
Yes, eventually but not right now. I have my heart set on bedside nursing. Perhaps when I have a family I would.
4. Do you feel like this community site met the needs of the population they serve? Why or why not?
Yes, they provided fast results & medications the same day.
5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?
The NP doing pelvic exams was an amazing teacher for myself & patients. She explained everything she did during pelvic exams. Her teaching was adequate.

Instructional Module 6: Newborn Assessment

Gestational Age Assessment

Participate in a gestational assessment; document your findings on the New Ballard Score Form.

What was the gestational age based on your assessment? 40

What was the gestational age based on the antepartum record? 39

Is there a difference? yes

If so, what could be the reason for the difference? the ballard score is kind of subjective

AGA LGA SGA

Gestational Age Interpretation:

If your baby was LGA or SGA, describe the contributing factors and potential complications:

NEUROMUSCULAR MATURITY
