

Covenant School of Nursing

Disciplinary Action Summary Assignment

Instructional Module 2

Student Name: **Daniella Solis**

Date: **01/17/24**

DAS Assignment # **1**

Name of the defendant: **Michael Jesse Anderson RN**

License number of the defendant: **633555**

Date action was taken against the license: **December 27, 2016**

Type of action taken against the license: **Warning with stipulation and a fine**

- *Use the space below to describe the events which led to the action(s) taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*
-The defendant falsely transcribed orders to another patient from another facility. He then used them as admission orders and did this without the admitting physician and without authorization. This action resulted in making the patient have an inaccurate medical record.
- *Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.*
-To prevent this, I would have talked to the physician first and got their approval to admit the patient. With doing that, the patient would then have their normal medical record instead of an inaccurate one. This would avoid giving this patient an improper treatment that could potentially harm them.
- *Identify ALL universal competencies were violated and explain how.*
Communication- defendant did not communicate with physician about admitting the patient and needing admission orders.
Safety & Security- in this case, the patients' medical records were wrong potentially giving them the wrong treatment that could cause them harm.
- *Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described. In other words, you are the one who discovers the patient has*

been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

I would immediately report it to the charge nurse working that shift and to the patient's physician.
