**Instructional Module 6
Obstetrics Community Clinical Experience**

Community Site: Dr. Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

Today I observed multiple ultrasounds and got to listen to fetal heart tones through the doppler & locate the baby for this.

2. What was the best/most interesting part of the experience?

The best part of this experience was hearing a baby's heartbeat in person for the first time.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would work in this position because I feel like the bond you get to create with the patients is more cultivated than in a hospital in the sense that you see them so often.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I do believe they met the needs of all of their patients today by answering any and all questions and concerns.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I did witness a lot of patient teaching regarding birth control postpartum. In general the moms were told why it is important and the complications that can come from getting pregnant right after giving birth. I do feel like they adequately taught every patient today because everyone voiced understanding and most chose a birth control plan.
