Clinical Care Concept Map

Patient Presentation:

Friendly

A&O x4

Positive affect

Assessment/noticing cues:

RUL wheezing

Sore throat

Abdominal pain when coughing

Frequent coughing

Primary Concept:

Gas exchange/oxygenation

Related Medical Diagnosis:

Flu

Relevant diagnostic Tests, Treatment, and Relevant Medications:

Decreased WBC

Decreased neutrophils

Interpreting and Prioritizing cues:

RUL wheezing

Productive cough

Worst Case Scenario/Potential Complications:

Possible pneumonia

Sepsis

Responding/take action:

Raise HOB 30 degrees

Give pt. IS

TCDB

Mobility/ambulation

Antibiotics

Reflecting /evaluate outcomes:

Treat infection

Coughing decreases

O2 sats will stay above 90%
