<p><b>Step 1 Description</b></p> <p>I went to oceans for my clinical my first day I was on the younger side where I helped pass trays out, joined group treatment team, &amp; colored w/ patients. 2nd day was a busy morning on the older side I helped w/ patient care, treatment team and helped w/ therapy activities</p>	<p><b>Step 4 Analysis</b></p> <p>Seeing all ages, people puts all this in perspective for me. mental health is a problem and its really brave for all the patients to be there and get help.</p>
<p><b>Step 2 Feelings</b></p> <p>When I was first there I was a bit emotional due to the younger people &amp; what they go through but throughout both days I was really glad for the experience &amp; people I met.</p>	<p><b>Step 5 Conclusion</b></p> <p>I learned a lot, I think I did all I could do @ oceans. I felt like I participated w/ all events, patients &amp; staff.</p>
<p><b>Step 3 Evaluation</b></p> <p>talking to different patients was good, seeing different diagnosis was interesting to me, but also made it difficult because it was emotional for me. I thought my patient care was good and now I need to connect to them.</p>	<p><b>Step 6 Action Plan</b></p> <p>I enjoyed oceans, I had a good experience with the staff and patients it really opens up your mind taking care of patients having these problems. I can apply what I learned @ oceans in all my nursing care.</p>
