Capstone Preceptorship: Student Self-Evaluation

1. Please reflect on your performance during the capstone preceptorship and rate yourself on the following:

Table with 4 columns: Statement, I need significant guidance, I need average guidance, I need minimal guidance. Rows include items like 'I use the Nursing Process to provide comprehensive, evidence-based nursing practice' and 'I coordinate and develop a plan of care using time management and prioritization'.

2. What do you think are your personal strengths?

I question a lot of things, and I'm not afraid to, but I think that helps me learn the most. I don't show when I'm stressed, so that makes me feel like I work well under pressure. I love talking to people, so that will help me build trust with my patients.

3. What have you identified as a personal opportunity for improvement?

Learning how to prioritize & cluster care has been my biggest challenge. I think I've improved while working with my preceptor. Also, creating a good relationship with my patients builds great trust & I've been able to identify that!
