

HESI Adaptive Quizzing IM 5

HESI Adaptive Quizzes will be worth 7.5% of your final grade.

Take attempt # 1 in the unit quiz. If you do not get 80%, take attempt #2, and so on in that unit quiz. If you do not get 80% in one of the 3 attempts, you will receive a 0 for that unit quiz. If you receive an 80 or above on at least one of your attempts in each unit HESI adaptive quiz that will be a 100 in the gradebook for that unit quiz grade. All 4 unit quiz grades will be averaged to equal 7.5% of your grade.

**Be sure you are taking the correct unit quiz if there is no attempt made on a unit quiz then it is recorded as a zero.

Students are ENCOURAGED to USE RESOURCES to complete the unit quizzes. If a student meets the 80% or greater, they are encouraged, but not required, to complete the remaining attempts for the unit adaptive quizzes.

*Please note that the Unit quiz is not only information that you have learned for that exam. It may have pediatric concepts you have not had, so please use all resources to find correct answers.
