

Jimmy John Notes for Instructor

Summary Discussion

Divide class into 2 groups. Each group will need to decide on a spokesperson once they go to the atrium who will serve as their speaker once both groups are back in the classroom. Group 1-go to Jimmy for 15 minutes and then to the atrium for 15 minutes. Then go to Janie June for 15 minutes and then back to classroom. Group 2-go to Janie June for 15 minutes and then to the classroom for 15 minutes. Then go to Jimmy John for 15 minutes and then to the atrium for 15 minutes.

When both groups are back in the classroom, start with group 1. "Tell me one thing you noticed during your assessment that was not per the orders." Repeat with group 2.

Have someone with good handwriting write what each group says on the board.

Here's a list of what they should/could say for Jimmy John:

IV set up incorrect-IVPB lower

ID band incorrect-name and MR#

HME not connected

IV fluid rate wrong

Syringe and needle in bed

Foley not secured to leg and wrapped around leg

BP cuff too small=high BP

IV site bloody-assess site

Urine output below minimum

No swab caps

Chest tube water seal chamber above 2 cm

Head hyper extended

Trach tie untied

No labels on IV and IVPB tubing

Pulse ox 88%-call doc

Trach hydrophilic pad upside down

Need 2 trachs at BS, 1 same size and 1 that is 1 size smaller-need to be in unopened packages

Extra trach too big

HOB flat

Call light under patient

IV had armband

No suction equipment

G button open and draining bile like fluid

Wearing hat with head injury

Dinosaur too close-might later skin integrity

No tape on chest tube connections

No occlusive dressing on chest tube

Chest tube with dependent loops and has safety pin holding up loop

No extra chest tube at bedside

What size CT is it? Where is it taped? Do they know?

IV line clamped

IVPB hooked up below the pump
