

## Advancing School Health: Building a Partnership Between School Nurses and the Centers for Disease Control and Prevention

1. Schools in the United States provide health services to support student well-being. School nurses are a key role. List 5 things the school nurse does in this role.

Perform physical assessments.

Conduct screenings.

Treat acute illnesses

Manage chronic conditions (asthma, diabetes, epilepsy)

Offer skilled nursing treatments (nebulization, insulin admin.)

2. Name 2 tools or surveys developed by the CDC that have contributed to advancing school health services.

Health Profiles survey

Youth Risk Behavior Surveillance (YRBSS)

3. Name one disadvantage identified in representing school nurses' roles within these CDS surveys.

The surveys rely on school principals and other health education teachers instead of school nurses who directly provide services.

4. What is the predicted outcome for the collaboration between school health nurse scientist and the CDC?

Advancing school health initiatives

Help shape healthier school environments.
