

Patient Preparation Worksheet

Time	Meds/Care Priorities	Labs/Glucose

Initials: _____ Room #: 3 Adm. Date _____ Post op day# _____

Diagnosis: Sepsis, Abd distention, UTI, N/V Sepsis

Current problem: STEMI

Patient Story: 62 years female w/ confusion

AAA, type 2 DM, Permanent Afib, Ischemic Cardiovascular

Aspiration pneumonia, HTN

Acquired hyperthyroidism

Pacemaker, UTI prior to arrival, treated w/ rocephin

Allergies: Cocaine, Gabapentin, Simvastatin

PRIORITY Body System to Assess: Cardiac

	CV	Resp	Neuro	GI	GU	Skin	VS/Pain	Other
Prior Nursing Assessment			Alert conscious disoriented to time					
Current Nursing Assessment		diminished crackles all lobes	oriented x4	hyperactive tact				

Abnormal Relevant Lab Tests	Current	Clinical Significance
Complete Blood Count (CBC) Labs		
WBC	33 →	16.48 ↑ Infection
Hgb		9.5 ↓ body is getting less oxygen
Hct		29.5 ↓ hypothyroidism!
Metabolic Panel Labs		
AST		101 ↑
ALT		115 ↑
Misc. Labs		
Troponin		1518 ↑ MI
Lab TRENDS Concerning to Nurse?
