

**Instructional Module 6
Obstetrics Community Clinical Experience**

Community Site: Parkridge Pregnancy Center

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

We had 2 pregnancy confirmations, and a STD test. I was able to observe an STD swab and 2 pregnancy tests.

2. What was the best/most interesting part of the experience?

The best part was the education the nurses were able to teach me, I was able to ask questions about many different things that we have learned in lecture, and they were able to answer me.

3. Is a community nursing position something that you would consider working in? Why or why not?

It is not, it was too slow paced for me, and I think I would get a little bit bored doing that every day because I enjoy very fast paced and more critical situations than this clinic was equipped to handle.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I think that they did because they are able to serve patients who do not have insurance, as well as help with confirmation of pregnancy for people who did not already have OBGYNs.

**Instructional Module 6
Obstetrics Community Clinical Experience**

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

My nurse was able to educate a patient about her miscarriage and what her further steps would be. I think the teaching was great and the patients were able to understand why things happened the way they did. Along with the other 2 patients who were educated on their next steps about their situation.
