**Instructional Module 6  
Obstetrics Community Clinical Experience**

Community Site:                     Parkridge                    

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I got to observe multiple pregnancy tests, a couple STD tests, and some syphilis test as well. I also got to see an abdominal ultrasound and a vaginal ultrasound.

2. What was the best/most interesting part of the experience?

The most interesting thing was probably the vaginal ultrasound because I had actually never seen it before, and it was cool to get to see the heartbeat of the baby.

3. Is a community nursing position something that you would consider working in? Why or why not?

I probably wouldn't. No disrespect for the people that do do it, but it is just not for me

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, I really feel they are very helpful and provide very good resources for the people in need in the community.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

They were very good at teaching if a patient expressed worries about finances they were very good in providing information about resources that could really help that patient out.
