

Student Name: \_\_\_\_\_  
\_\_\_\_\_

Date:

## Instructional Module 6: Antepartum Clinical

### Situation:

Patient's room #: \_\_\_\_\_ Age: \_\_\_\_\_ Diagnosis:

Gestational Age: \_\_\_\_\_ weeks

### Background:

What factors placed her pregnancy in the high-risk category?

What are the physical & psychosocial stressors the patient has identified because of her high-risk situation? What are the impacts to her and her family?

What type of antepartum testing has she experienced? How do she and her family feel about the tests?

### Assessment:

What supportive measures have helped the patient and her family cope with the situation?

What impact does her high-risk status have on her fetus?

Has she and her family toured the NICU? How does she feel about the possibility of her infant being admitted to the NICU?

### Recommendation:

What is the plan of care for the patient and her infant?
