Nursing Inspiration

I want to be a nurse because I want to connect with individuals and to be able to aid in the recovery and health of individuals. I work as a nursing assistant and I have been able to connect with patients in ways I do not believe any other career could bring. I want to advance my title to registered nurse because as an aide there is only so much I can help patients with but limited to access of. I want to be knowledgeable of my patients' diagnoses and how I can help my patients. Due to only being an aide, I can only assure them that their nurse is coming and it moves me in an odd way that there isn't much I can do to make my patients feel comfortable all the way. Serving others and aiding them in their times of need is a calling for me and I am ready to pick up the call.
