

My name is Mario Sanchez, and I have a couple of reasons why I decided I want to become a nurse. The first reason I'd say is because my Tia is an Lvn and I see all the traveling she gets to do around the country, and I would love to experience that! The second but main reason I want to become a nurse is since I was a kid I loved helping people. I see this being a way of continuing that in a way that actually makes a difference in people's lives. Since I've been a cna I've grown so close with my residents at the nursing home I work at making me more invested and reassured I'm going down the right path!
