

Student Name Crystal Vargas Date: 8/21/24

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Dr. Lamotte

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

Gave an IM TDAP Injection, participated in collecting pap smear samples, and took vitals on patients.

2. What was the best/most interesting part of the experience?

Interacting w/ the expectant mothers that are familiar w/ the clinic staff and answering questions according to what we just learned in lecture.

3. Is a community nursing position something that you would consider working in? Why or why not?

I enjoy working in the clinic, however bedside nursing provides a more flexible schedule.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Definitely. Dr. Lamotte and staff took time to explain all procedures and give plenty of education.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witnessed patient teaching w/ every patient even if they were further along. Dr. Lamotte did a very good job in informing his patients the need for immunizations (TDAP) and an annual patient the importance of mammograms.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes

Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

All family members were welcome in the office and were included in the visit.

Professionalism:

Rhonda was very professional and caring while returning phone calls and emails throughout the day.

Communication & Collaboration:

Dr. Lamotte informed the staff of follow ups needed after every visit.
