Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Dr. Zavala

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to see ~~the~~ Dr. Zavala perform many cervical exams

2. What was the best/most interesting part of the experience?

The most interesting was watching the Dr./patient relationship and how invested Dr. Zavala is in her patients care

3. Is a community nursing position something that you would consider working in? Why or why not?

I would consider it after this clinical rotation because it is actually very busy and more calm than a hospital setting

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes I feel like it more than met the need because of how attentive Dr. Zavala was to her patients

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

There was so much teaching. Dr. Zavala provided patient teaching to everyone of her patients from 8am-5pm. the most common patient teaching was about the flu, TDAP, and RSV vaccine and how to protect themselves and babies with the up coming flu season.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality: There was lots of planning for what would be best for each patient as far as delivery and what would keep patient safe during pregnancy

Patient Centered Care:

Professionalism:

Communication & Collaboration:
