<p><b>Step 1 Description</b></p> <p>I have been on pedi floor for 3 shifts and spent 1 shift on DB acute. I loved pedi floor. I love how calm it has felt. Keeley is my preceptor and has been really good to learn from. Today I am spending my shift with Kayla who has been so kind. DB acute is <del>now</del> newly opened.</p>	<p><b>Step 4 Analysis</b></p> <p>I can apply these experiences in my future clinical for the final and also in my future as a RN. I have seen some CA patients that can help me on my unit and I have been with worried family members that have helped me learn how to properly communicate.</p>
<p><b>Step 2 Feelings</b></p> <p>In the beginning I was nervous because I love kids but did not know how I would be w/ sick kids. I have opened up on pedi floor and have really enjoyed my time on the floor. Here on the DB acute floor I wasn't too excited because I never wanted to work with the tiny babies but this floor has showed me good things.</p>	<p><b>Step 5 Conclusion</b></p> <p>I feel like <del>that</del> if we would have known Keeley was going to have an ort we could've changed to make my experience better, being w/ her is great but my last shift I didn't get to do as much. Both preceptors have done such a good job. I am going to be better @ taking initiative and being more independent.</p>
<p><b>Step 3 Evaluation</b></p> <p>Working with kids/babies has been great. I have got to see how resilient these pedi/niur patients are. It has been easy to work with their medications because they don't have much. It has been hard to watch these patients go through tough procedures and be in pain because they are so young.</p>	<p><b>Step 6 Action Plan</b></p> <p>Overall I have enjoyed my placement and the people &amp; patients I have worked with. I plan to come out of this confident in myself to care for people as a nurse, and will work towards that my next 2 shifts.</p>
