POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 1600

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
What feelings did you experience in clinical? Why?	I was kinda nervous because I didnt know what was coming my way.
What did you already know and do well as you provided patient care?	I knew what assessments / plan I wanted to do, with all the things thrown at me I still followed my plan well.
What areas do you need to develop/improve?	I think I can work on better Therapeutic communication and educational teachings.
What did you learn today?	I learned how to adjust to anything that comes my way, & to slow down & just think it through.
How will you apply what was learned to improve patient care?	I will work on communication & study more on educational goals.
Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.	<ol style="list-style-type: none">1. Clinical judgement - did treatment based on patients current signs & symptoms.2. Communication - I keep the patient calm while she was really stressed by talking / reassuring her.3. patient centered care - The whole scenario I keep my patients pain as the 1st priority
