A light green, textured brushstroke background that starts on the left and extends towards the right, with some white space visible on the right side.

Kathleen

Davidson

License #: 849447

At the time of the reported incident (October 12, 2019), Ms. Davidson was a registered nurse at St. David's North Austin Medical Center in Austin, Texas. During her employment, Ms. Davidson failed to assess and document the vital signs regarding the patient JH, as well as failing to contact the patient's provider regarding previous complaints of pain in her chest and back. Afterwards, she tried to record this information despite the time for making late entries having already been expired.

TEXAS NURSING
JURISPRUDENCE AND ETHICS

Ms. Davidson could have caused her patient to be in grave danger, due to her not contacting the patients provider regarding her chest and back pain.

Ms. Davidson should have also went to the charge nurse to explain why she hadn't documented the patients vital signs in a timely manner.

Professional Role

If I was the prudent nurse:

After checking on the patient, I would have asked Ms. Davidson why she has not contacted the physician regarding the patients complaint and I would offer to call him/her myself.

I would also advise Ms. Davidson to speak with the charge nurse regarding her late documentation.
