Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Dr. Zavala clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

The day started off pretty busy with atleast 45 patients scheduled. I observed several procedures, including cervical exams, sonograms, doppler tones and pelvic exam.

2. What was the best/most interesting part of the experience?

The best part of the experience was talking to the patients and watching some of the procedures being done.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, I would consider working in a community clinic. I like how fast paced it is & the working hours.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, the clinic was able to provide complete care for their patients and provide answers to all their questions.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I think Dr. Zavala did a great job teaching. She used therapeutic communication with the patients. She made sure each patient felt understood and comfortable during their visit.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

Safety & Quality:

Providing written hand off information to the patient and educating them about the vaccine they are receiving.

Clinical Judgment:

Instructing the patient to immediately report any signs or symptoms of preeclampsia and any bleeding occur during pregnancy.

Patient Centered Care:

Respecting a patients request to exclude students from their care during their visit.

Professionalism:

Ensuring family privacy is maintained during examinations and discussions.

Communication & Collaboration:

Encourage families to participate in their care making sure they feel confident
