<p><b>Step 1 Description</b></p> <p>This is the reflection at the end after complete 10 shifts/120 hr of preceptorship on the CICU floor. During the time I learned the daily tasks and routine of the CICU unit.</p>	<p><b>Step 4 Analysis</b></p> <p>Module 8 clinical let us practice almost everything we learned. From making the bed to safety to reading the labs and make clinical judgment. It help me to understand the lecture more when you apply the concept during work.</p>
<p><b>Step 2 Feelings</b></p> <p>Today is the first time I see a patient passed away and help out during post mortem care. After that we transferred the pt on the cart. It's an importance lesson of the role of nurse and hospital in this type of event.</p>	<p><b>Step 5 Conclusion</b></p> <p>I think the experience doing clinical in CICU is the best one so far in nursing school. And it inspired me to talk to the nurse manager and introduce myself and gave him my resume. Hopefully in near future I can work on this floor.</p>
<p><b>Step 3 Evaluation</b></p> <p>I had a good preceptor during the preceptorship. He introduce me to other staff and around the floor. And treat me like a peer co-worker. I gained confidence and perform all nursing task and start charting under his examples.</p>	<p><b>Step 6 Action Plan</b></p>
