<p>Step 1 Description</p> <p>When I attended the ASpire Recovery mens center I was just waiting at the beginning talking to the owners of the facility. When I got there Robinson which is the main person/owner was in a group meeting after he finished he came to introduce & give us a tour of the house.</p>	<p>Step 4 Analysis</p> <p>Everyone in this recovery had one thing in common and it was alcohol use. I can apply that all these men grew up to childhood trauma & never got the appropriate coping skills growing up.</p>
<p>Step 2 Feelings</p> <p>At the beginning I was a bit nervous because I thought the men were like newly recovering drug addicts & I thought they were going to have some withdrawal signs & symptoms but I thought wrong. Once Robinson introduced himself & we introduced ourselves to him I felt like I was in the right place for a great learning experience.</p>	<p>Step 5 Conclusion</p> <p>I feel like a lot of the men struggle with communicating how they feel & are scared people are going to judge them so I feel like more communication from the clients would be better. I have learned to never judge anyone & men don't have to be tough their whole life they need to express how they feel as well.</p>
<p>Step 3 Evaluation</p> <p>I love how the owners/staff/clients were so welcoming to all of us. The group discussion went really well the whole teaching experience went so well. I took a lot from it. I continued what we learned from class into what they were talking about such as finding out the underlying cause of what caused them to start drug use and/or alcohol use.</p>	<p>Step 6 Action Plan</p> <p>Overall this was one of my best clinicals to attend. I can see those men that take mental health serious will have healthy outcomes if they stick & follow the 12 steps in the retreat. I can use the lessons I learned in the future by assessing what caused them to have these issues & teach them good healthy coping skills to improve future life.</p>
