Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Parkridge

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed Emily talking to a pregnant patient & educating her on her options

2. What was the best/most interesting part of the experience?

The history of Parkridge was interesting to me, I had no idea it was a non-profit organization funded by the people in Lubbock.

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes. Emily gave me great insight on her job & explained how rewarding it is.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes. They offer 100% free care to pregnant moms in need, along with free therapy, STB testing & antibiotics.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes. Emily taught the pt the importance of supplements, staying hydrated & reassured a pt experiencing painful cramps. The pt teaching was definitely adequate & the way Emily delivered it was reassuring & nonbiased.

6. Provide examples of care describing one or more of the IM6 Student Learning Outcomes.

Safety & Quality Clinical Judgment Patient Centered Care Professionalism Communication & Collaboration

Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.

Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.

Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.

Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.

Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality: Based on how the pt filled out the questionnaire sheet, Emily was able to plan on how to talk to the pt & provide appropriate education
Clinical Judgment: Emily performed hand hygiene before entering a room & prior to leaving
Patient Centered Care: Emily treated the pt's with respect & engaged in decisions related to their care
Professionalism: Emily was attentive while the pt spoke about her past history
Communication & Collaboration: Emily provided non-biased pt teaching
