

Reflection

I have really enjoyed the opportunity to have my preceptorship on the oncology floor. My knowledge and skills have increased greatly throughout my experience thanks to Jennifer, she is a great preceptor. For instance, she explains everything to me, like medications, documentation and why they have certain rules on the floor. She has allowed me to practice many skills. I performed two dressing changes, administered medications, and documented. When I cared for my first patient, she let me do everything on my own while she was by my side. I performed an assessment on my patient and administered her medications. After the assessment I was able to document it. Although, I did not document it on my account because it was having issues. So, I documented it on her account. One thing I have really appreciated about Jennifer is that she will explain anything to me that I am having trouble with. For instance, I have trouble setting up IV pumps, so she has walked me through it multiple times. Also, I told her I would like to get better with my SBAR, so she had me give SBAR to the night shift nurse.

Overall, I would say that working twelve-hour shifts has given me the opportunity to experience a lot. It's been very helpful on learning how to delegate my time and balance patient care. I have really enjoyed it, and I'm excited to continue my learning.
