Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed STD testing and treatment
Blood draw, oral swab, urine test, looked
at cultures under a microscope

2. What was the best/most interesting part of the experience?

The best part of the day was taking part in diagnosing
Trichomonas on a wet prep sample under a microscope

3. Is a community nursing position something that you would consider working in? Why or why not?

I would consider working in a community center
But I don't think the STD clinic is for me.
Handling and treating extremely dangerous chronic pathogens
scary sometimes

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, having fast testing and an in house pharmacy
makes treating the population very easy

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes. The patient diagnosed with trichomonas
was taught how to be safe, follow up, and follow
medication orders. The patient teaching at this site
was very good

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

following PPE with every Pt. to protect myself and them

Clinical Judgment:

when drawing blood, I had to remember that the best veins are the ones you can feel, not just see, I had to feel around a little bit, but I did not miss

Patient Centered Care:

Therapeutic Communication with Patients with STDs that it will be okay and they can live a normal life

Professionalism:

Making sure the Pt is comfortable with me being present and drawing blood

Communication & Collaboration:

Communicating and collaborating with the Lab that a suspected infection is present so they know what to look for
