

## Advancing School Health: Building a Partnership Between School Nurses and the Centers for Disease Control and Prevention

1. Schools in the United States provide health services to support student well-being. School nurses are a key role. List 5 things the school nurse does in this role.
  1. Treatment of chronic conditions
  2. Physical assessments
  3. Collaborating with other health care professionals for the well being of the students
  4. Coordinate services for mental health of students
  5. Able to more closely evaluate children for physical and behavioral changes in regards to mental and physical health
2. Name 2 tools or surveys developed by the CDC that have contributed to advancing school health services.

YRBBS & School Health Profiles
3. Name one disadvantage identified in representing school nurses' roles within these CDC surveys.

They do not get direct feedback from the healthcare provider themselves, or those with the direct knowledge of healthcare.
4. What is the predicted outcome for the collaboration between school health nurse scientists and the CDC?

Healthier environments, further promotion of child/patient mental and physical care, care more organized by healthcare professionals or those in direct care of the patients themselves
