POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
<p>What feelings did you experience in clinical?</p> <p>Why?</p>	<p>Nervousness, Anxiety.</p> <p>Just because it is graded and I wanted to do everything right.</p>
<p>What did you already know and do well as you provided patient care?</p>	<p>How to place toc/FFEM. Starting IVs/uids. Pt education.</p>
<p>What areas do you need to develop/improve?</p>	<p>Communicating with difficult family members.</p>
<p>What did you learn today?</p>	<p>I learned things can move quickly during a labor. Unexped situations can occur. Have a plan before entering a room. (What steps in order)</p>
<p>How will you apply what was learned to improve patient care?</p>	<p>Stay calm through all situations, do not rush things. Make a mental list of priorities and execute them :)</p>
<p>Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.</p>	<p>1. <u>Communication/Collaboration.</u> Our groups worked well with each other and assisted in all the needed areas. Learned how family can interup a procedure but also how to deal with them.</p> <p>2. <u>Professionalism</u> As a nurse, I advocated for a patient where her partner was making decisions for. I let him/her know that it was ultimately her decision for pain meds if she made them not her partners decision.</p> <p><u>Patient centered care</u> The patient and partner were more concerned about a trip and not the post partum care for patient and baby. I educated the family on how important post partum care is for mom and baby.</p>
