Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to perform multiple blood draws, HIV tests, & administer 1 prophylactic injection for syphilis, as well as a throat swab

2. What was the best/most interesting part of the experience?

I found the whole clinic to be very interesting. The best part of my experience was that I was able to perform the tests

3. Is a community nursing position something that you would consider working in? Why or why not?

I think I would like working in this particular clinic because you learn so much & build rapport with some patients

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, I feel like a lot of people utilize their resources & they provide a lot to those who cannot afford it.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I witnessed various types of teaching as far as what to expect, what tests were being done & how long they would take, & how to avoid.

The population were taught how to provide safe sex & the importance of condom use with multiple partners. I feel like the teaching was more than adequate!

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Performing hand hygiene & donning appropriate PPE to Perform the needed tests along with handling my supplies diligently

Clinical Judgment:

Reading on the Patients symptoms the nurse & I formed a care plan on what the pt may need to be tested for

Patient Centered Care:

one of my Patients was very afraid of needles, & as I was about to draw her blood I reassured her that I would be

Professionalism:

as gentle as possible & that it is okay to be scared
Remained Professional when interacting with all my Patients & remained actively engaged when they talked

Communication & Collaboration:

Communication with the Patients on what care I would be providing such as blood draws, & HIV testing
Collaboration with the nurse when delegating these roles to me
