<p>Step 1 Description My patient was a G4 P4 L4 who had an induced vaginal delivery @ 1309</p>	<p>Step 4 Analysis For oxytocin I was able to know what it does and see the effects on the FHR strip I was also able to be able to read the strips and notice the different types of decels.</p>
<p>Step 2 Feelings I was nervous because my patient was a little hesitant to have students and this was my first clinical rotation for Level 0</p>	<p>Step 5 Conclusion I would have been less scared and more confident and involved</p>
<p>Step 3 Evaluation It was something I've never experienced and I'm glad I was able to. I felt like I did well following my nurse around and advocating</p>	<p>Step 6 Action Plan I was very grateful for this experience and for next time if I do choose this route I would be more confident because I am smart enough to do more</p>
