

### Instructional Module 6: Obstetrics Community Clinical Experience

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

<b>IM6 Student Learning Outcomes</b>				
<b>Safety &amp; Quality</b>	<b>Clinical Judgment</b>	<b>Patient Centered Care</b>	<b>Professionalism</b>	<b>Communication &amp; Collaboration</b>
<i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i>	<i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i>	<i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i>	<i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i>	<i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i>

**Professionalism:** During my rotation with Bridget Winn there was a patient that was asking about birth control options but was very nervous about it effecting her fertility. I was able to explain that each form of birth control has its own timeline for fertility to return but there are several options that have shorter periods. Winn, myself and the patient were able to discuss the options and come up with a plan of what was best for the patient based on her family goals.
