**POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359**

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
What feelings did you experience in clinical?  Why?	I was nervous for it because you really don't know what to expect to encounter in SIM
What did you already know and do well as you provided patient care?	I felt like I did a good job discussing reasons for med admin and why they were experiencing the symptoms present
What areas do you need to develop/improve?	ID bands: during my scenario my PT was abducted and security had to be alerted
What did you learn today?	I learned the reason for proper ID and I was able to refresh on IM injections in a newborn. I also refreshed myself in med teaching.
How will you apply what was learned to improve patient care?	Properly identifying people in the room will allow me to create a PT safe environment and accomplish my PT goal in a professional manner
Please <b>reflect</b> on how your OB simulation learning experience assisted in meeting 2-3 of the <b>Student Learning Outcomes.</b>	<ol style="list-style-type: none"><li>1. Patient Centered Care : I educated the need for Vitamin K injection and heel stick glucose monitoring. I also taught on how symptoms were r/t to the testing required.</li><li>2.</li><li>3.</li></ol>
