

STUDENT AD LOG-IN ACCOUNT VS EMPLOYEE ACCOUNT

It has come to our attention that students may be charting in their employee account instead of their student account while they are in the student role. Please make sure you are using s. in front of your AD log-in for your student account. It is YOUR responsibility to make sure you are in the appropriate account when charting in a patient's chart. When you are in the student role, if you access a patient's chart as an employee, it is a HIPPA violation. If you will look at the top left corner of the screen, it will tell you how you are accessing the chart - SN, Na, NT, RN. Some students have changed the color of their screen so they are sure they are in the correct account. Please do not let this error prevent you from completing nursing school or becoming an RN.
