Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD CLINIC

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed a lot of STD testing & STD treatments.

I was able to draw all the blood for testing & give the IM injections for treatment.

2. What was the best/most interesting part of the experience?

The most interesting part was realizing how high the syphilis rate is in Insubok.

3. Is a community nursing position something that you would consider working in? Why or why not?

No, I found it to be really fun, but my heart is set on trauma!

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes & no. I only say no because it is not a walk-in clinic, I feel like if they had that option more people would seek treatment.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Most of my day was patient teaching. We taught things like safe sex practices, signs to look out for regarding STD's, and the importance of taking your medication correctly. We went into a lot of detail with each patient.

6. Provide examples of care describing one or more of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

Professionalism:

every time a new patient came in, the nurse I was with allowed the patients to speak about their problems without judgement

Communication & Collaboration:

the nurse was amazing at explaining things such as patient teaching to every patient. she also allowed them to ask anything and was able to respond to the best of her ability and without judgement
