

IM8: Capstone Appraisal of Student Performance

(preceptor Completes and Review with student)

Student: Rebecca Anaya
 Unit: AED

Midterm: ✓
 Finals: _____

1. Please reflect on the student's clinical performance during the capstone preceptorship and appraise the following:

Clinical Learning Outcomes	Below Average Performance Needs Significant Guidance	Satisfactory Performance Needs Average Guidance	Outstanding Performance Needs Minimal Guidance
a. Safety/Quality: Integrate nursing care using evidence-based practice to promote safety and quality for patients, self and others			✓
b. Communication: Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in various healthcare settings. (SBAR, Documentation, patient advocacy)		✓	
c. Clinical judgement: Integrate use of current evidence-based practice and clinical competence when making clinical decisions in the provision of patient centered care. (Clinical Judgement model)		✓	
d. Patient centered care: Integrate nursing care for patients from diverse backgrounds based on patient age, culture, values, and educational needs.		✓	
e. Professionalism: Integrate knowledge, skills, and attitudes required of the professional nurse, embracing lifelong learning to improve the quality of healthcare.		✓	

2. What do you think are the student's personal strengths?

Very knowledgeable and comfortable interacting with patients and families - very willing to learn

3. What have you identified as an opportunity for improvement for the student?

confidence and IV starts - as discussed practice will be the most helpful.

POST CLINICAL REFLECTION DAY 1

This exercise strengthens your clinical judgment skills.

Reflect on your clinical day and the decisions you made caring for this patient by answering the questions below.

Day 1 Reflection Questions	Student Nurse Reflection
What feelings did you experience in clinical today? Why?	Frustration, dislike, empathy. I was watching the lucas device doing compressions on a cardiac arrest pt + my opinion I feel it did more harm than good. 
What did you already know and do well as you provided patient care today?	How to treat both mother & son w/ dignity, respect, & compassion so that son goes to get addiction help that he has asked for since he started using 20yrs ago.
What areas do you need to develop or improve?	Not to be so timid when advancing IV catheters, to be quick & smooth in one steady motion.
What did you learn today?	That there is a machine that can do chest compressions. Also, that there is a lot of homeless & drug addiction present in Lubbock than what I thought or knew.
How will you apply what was learned to improve your patient care?	Honestly, I will take it day by day & one patient at a time to adjust my patient's care.

Frustration, & empathy for a mother
who's 36 y/o son is addicted to heroin
& brought him in for medical clearance
to receive help from Dove Tree.
