

Student Name Mayci Wood

Date: 1/28/25

**Instructional Module 6: Obstetrics Community Clinical Experience**

Community Site: Angela Westfall, CNM - Covenant Medical Center

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to participate/observe in a PCOS screening, A wellness visit, Nexlapon insertion, Annuals, ~~and~~ & a pap-smear.

2. What was the best/most interesting part of the experience?

I thought it was interesting to watch how they navigate tricky situations. Such as when a pt insist on one thing & them inform the pt why thats not always the best for them at this time.

3. Is a community nursing position something that you would consider working in? Why or why not?

yes, I like that it is laid back, organized, & a positive work environment. I also like how personable & engaged they are w/ each visit.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

yes, they communicated very well w/ each pt. They also provided the meds & information that is needed to better the pt's understanding

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witnessed pt teaching w/ the Nexlapon insertion such as to change the bandaid out after showers for about a week, She also informed her to still use condoms for about a week. She also taught that the way it works is by releasing hormones in the arm. Common teaching is practicing safe sex & reporting new abnormalities

# Nexplanon insertion

6. Provide examples of care describing one or more of the IM6 Student Learning Outcomes.

Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

**Safety & Quality:** Quality care & safety was demonstrated when the risks of different forms of birth control were discussed w/ the pts.

**Clinical Judgment:**

I saw good clinical judgement when watching a Nexplanon insertion & she truthfully told the terrified pt what to expect.

**Patient Centered Care:**

The pt. took the procedure extremely well knowing what they provide information to the pts that show they have to expect the pts best interest & are willing to calmly listen to pts. concerns.

**Professionalism:**

They handled irritating situations very professionally by practicing good communication & maintaining a calm environment.

**Communication & Collaboration:**

The nurse would communicate everything w/ Mrs. Westfall & they would tagteam w/ their pts to provide the best care for their pts.
