

## Covenant School of Nursing Reflective Practice

*Learning to be a reflective practitioner includes not only acquiring knowledge and skills, but also the ability to establish a link between theory and practice, providing a rationale for actions. Reflective practice is the link between theory and practice and a powerful means of using theory to inform practice thus promoting evidence based practice.” (Tsingos et al., 2014)*

Using the Reflective Practice template, document each step. The suggestions in the boxes may help you as you reflect on the incident. This Reflective Practice document will be reviewed by faculty and then you will post the final reflection in your LiveBinder folder.

<p><b>Step 1 Description</b>                  A description of the incident, with relevant details. <u>Remember to maintain patient confidentiality.</u> Don't make judgments yet or try to draw conclusions; simply describe the events and the key players. Set the scene! It might be useful to ask yourself the following questions</p> <ul style="list-style-type: none"> <li>• What happened?</li> <li>• When did it happen?</li> <li>• Where were you?</li> <li>• Who was involved?</li> <li>• What were you doing?</li> <li>• What role did you play?</li> <li>• What roles did others play?</li> <li>• What was the result?</li> </ul>	<p><b>Step 4 Analysis</b></p> <ul style="list-style-type: none"> <li>• What can you apply to this situation from your previous knowledge, studies or research?</li> <li>• What recent evidence is in the literature surrounding this situation, if any?</li> <li>• Which theories or bodies of knowledge are relevant to the situation – and in what ways?</li> <li>• What broader issues arise from this event?</li> <li>• What sense can you make of the situation?</li> <li>• What was really going on?</li> <li>• Were other people's experiences similar or different in important ways?</li> <li>• What is the impact of different perspectives eg. personal / patients / colleagues' perspectives?</li> </ul>
<p><b>Step 2 Feelings</b>                  Don't move on to analyzing these yet, simply describe them.</p> <ul style="list-style-type: none"> <li>• How were you feeling at the beginning?</li> <li>• What were you thinking at the time?</li> <li>• How did the event make you feel?</li> <li>• What did the words or actions of others make you think?</li> <li>• How did this make you feel?</li> <li>• How did you feel about the final outcome?</li> <li>• What is the most important emotion or feeling you have about the incident?</li> <li>• Why is this the most important feeling?</li> </ul>	<p><b>Step 5 Conclusion</b></p> <ul style="list-style-type: none"> <li>• How could you have made the situation better?</li> <li>• How could others have made the situation better?</li> <li>• What could you have done differently?</li> <li>• What have you learned from this event?</li> </ul>
<p><b>Step 3 Evaluation</b></p> <ul style="list-style-type: none"> <li>• What was good about the event?</li> <li>• What was bad?</li> <li>• What was easy?</li> <li>• What was difficult?</li> <li>• What went well?</li> <li>• What did you do well?</li> <li>• What did others do well?</li> <li>• Did you expect a different outcome? If so, why?</li> <li>• What went wrong, or not as expected? Why?</li> <li>• How did you contribute?</li> </ul>	<p><b>Step 6 Action Plan</b></p> <ul style="list-style-type: none"> <li>• What do you think overall about this situation?</li> <li>• What conclusions can you draw? How do you justify these?</li> <li>• With hindsight, would you do something differently next time and why?</li> <li>• How can you use the lessons learned from this event in future?</li> <li>• Can you apply these learnings to other events?</li> <li>• What has this taught you about professional practice? about yourself?</li> <li>• How will you use this experience to further improve your practice in the future?</li> </ul>

## Covenant School of Nursing Reflective Practice

*Use this template to complete the Reflective Practice documentation. Do not exceed the space in each box. Any information not visible to you is lost.*

<p><b>Step 1 Description</b></p> <p>During my trust point visit I witnessed PT, OT, Speech therapy, Dietary, MD, case management, and nursing all involved in patient care.</p> <p>I was a part of all areas of rehabilitation from nursing and medication administration to observing all additional areas in the facility.</p>	<p><b>Step 4 Analysis</b></p> <p>A broader issue that arises from this event was the realization that patients in the hospital may not always get the attention they need from therapies and doctors due to the number of patients each one has in a hospital setting.</p> <p>Knowledge I can apply is that when we advocate for patients in the hospital we need to make sure we are assessing a variety of needs and make sure we advocate for our patients if they need additional assistance.</p>
<p><b>Step 2 Feelings</b></p> <p>The words and actions of others made me feel included, supported, and trusted at the trust point facility.</p> <p>The final outcome of my experience was insightful and encouraging.</p>	<p><b>Step 5 Conclusion</b></p> <p>Something I could have done differently is ask more questions and gain as much knowledge as possible from my experience.</p> <p>I have learned that many people contribute to the healing of a single patient and that healing is not just about health but also about the little things that contribute to a person's everyday life when they go home.</p>
<p><b>Step 3 Evaluation</b></p> <p>The meeting about patients and how everyone came together to give an overall picture of the patients and their status went very well.</p> <p>The good of my trust point visit was everything, all areas of the center worked cohesively and in unison to best serve their patients.</p>	<p><b>Step 6 Action Plan</b></p> <p>Overall I think trust point was an eye opener for me with the existent of communication and hands on healing that went into these patients recovery from health issues that impact many people every day.</p> <p>I will use this experience in future practice to evaluate my patients beyond the scope of traditional practice and advocate for their needs if something is needed before discharge.</p>
