Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Dr. Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed OB check ups at different stages and ultrasounds.
I used the doppler lots to assess and count fetal heart rate.
I also got to sit in on ultrasounds and the imaging that goes into that.

2. What was the best/most interesting part of the experience?

I would say, for me, actually seeing the different stages and feeling on an actual patient for babies.
It was also incredibly rewarding to hear their little heartbeat

3. Is a community nursing position something that you would consider working in? Why or why not?

Yes, but later in my career. Requires experience and it feels a bit calmer.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes! They (All staff) were incredibly kind and knowledgeable.
Meeting communication, info, and safety for all pts.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, like Ante/Post partum care - stages of development - NST / fetal movement, etc.

Very adequate teaching, never a hiccup or a doubt, followed all information I've been taught.

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes

Safety & Quality

Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.
