

6. Provide examples of care describing *one or more* of the IM6 Student Learning Outcomes.

IM6 Student Learning Outcomes				
Safety & Quality	Clinical Judgment	Patient Centered Care	Professionalism	Communication & Collaboration
Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.	Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.	Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.	Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.	Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.

**Safety & Quality:** safety for the child + mom regarding dose of oxytocin. Dr. wanted to ↑ oxytocin 5mu/6mu/min. TPCN communicated w/ Dr. it was unsafe.

**Clinical Judgment:** noticed late decels - intervened quickly while constantly rotating mom, notified MD, while staying w/ patient

**Patient Centered Care:** mom was in pain however, family said she could not get pain meds due to a natural b/m. focused that it is the patient's decision and we want a safe labor.

**Professionalism:** remained professional for mom and family when mom experiencing late decels and all team came in

**Communication & Collaboration:** communicated w/ mom about GBS was and care that would occur for her and baby.
