

IM1 “Round” Up

Laura Ingalls, Female

MR#5439802

DOB: 1/1/19XX

Situation

Patient is admitted to the unit complaining of shortness of breath (SOB), joint stiffness, generalized weakness and 15lb weight loss. Chronic indwelling urinary catheter placed three weeks ago.

Background

Allergies: Penicillin (PCN), latex, peanuts

History: Hypertension (HTN), type II diabetes mellitus (DM), rheumatoid arthritis (RA), bladder cancer with metastasis to the lungs

Assessment

Perform pertinent focused assessment

Recommendation

Review provider orders and initiate care:

- VS every 4 hours (Q4h)

- Blood glucose checks before meals and at bedtime (ACHS)

- Oxygen use: 2L NC for O2 sat < 92%; call provider if unresolved

- General diet with diabetic alteration

- Non-weight bearing bilateral lower extremities (NWB BLE)
