

Learning to be a reflective practitioner includes not only acquiring knowledge and skills, but also the ability to establish a link between theory and practice, providing a rationale for actions. Reflective practice is the link between theory and practice and a powerful means of using theory to inform practice thus promoting evidence based practice.” (Tsingos et al., 2014)

Using the Reflective Practice template, document each step. The suggestions in the boxes may help you as you reflect on the incident. This Reflective Practice document will be reviewed by faculty and then you will post the final reflection in your LiveBinder folder.

<p>Step 1 Description A description of the incident, with relevant details. Remember to <u>maintain patient confidentiality</u>. Don't make judgments yet or try to draw conclusions; simply describe the events and the key players. Set the scene! It might be useful to ask yourself the following questions</p> <ul style="list-style-type: none"> • What happened? • When did it happen? • Where were you? • Who was involved? • What were you doing? • What role did you play? • What roles did others play? • What was the result? 	<p>Step 4 Analysis</p> <ul style="list-style-type: none"> • What can you apply to this situation from your previous knowledge, studies or research? • What recent evidence is in the literature surrounding this situation, if any? • Which theories or bodies of knowledge are relevant to the situation – and in what ways? • What broader issues arise from this event? • What sense can you make of the situation? • What was really going on? • Were other people's experiences similar or different in important ways? • What is the impact of different perspectives eg. personnel / patients / colleagues?
<p>Step 2 Feelings Don't move on to analyzing these yet, simply describe them.</p> <ul style="list-style-type: none"> • How were you feeling at the beginning? • What were you thinking at the time? • How did the event make you feel? • What did the words or actions of others make you think? • How did this make you feel? • How did you feel about the final outcome? • What is the most important emotion or feeling you have about the incident? • Why is this the most important feeling? 	<p>Step 5 Conclusion</p> <ul style="list-style-type: none"> • How could you have made the situation better? • How could others have made the situation better? • What could you have done differently? • What have you learned from this event?
<p>Step 3 Evaluation</p> <ul style="list-style-type: none"> • What was good about the event? • What was bad? • What was easy? • What was difficult? • What went well? • What did you do well? • What did others do well? • Did you expect a different outcome? If so, why? • What went wrong, or not as expected? Why? • How did you contribute? 	<p>Step 6 Action Plan</p> <ul style="list-style-type: none"> • What do you think overall about this situation? • What conclusions can you draw? How do you justify these? • With hindsight, would you do something differently next time and why? • How can you use the lessons learned from this event in future? • Can you apply these learnings to other events? • What has this taught you about professional practice? about yourself? • How will you use this experience to further improve your practice in the future?

Use this template to complete the Reflective Practice documentation. Do not exceed the space in each box. Any information not visible to you is lost.

<p>Step 1 Description I had a patient who was paraplegic who developed a stage 4 ulcers by sitting on sticker that they couldn't feel due to their paralysis. I got to be with the wound care team to watch clean the wound and put a wound vac.</p>	<p>Step 4 Analysis Some issues im worried about is him having an infection due to one wound being covered with a dressing. This would require multiple dressing changes especially bowel movements.</p>
<p>Step 2 Feelings I was feeling very surprised when they should that he had two stage 4 ulcers and one of them was 6 inches long and 3 inches deep.</p>	<p>Step 5 Conclusion I learned that sometimes you must shave the bone because its too sharp and its not letting the muscle/tissue grow properly causing healing delay.</p>
<p>Step 3 Evaluation What was good about the event was they were able to put the wound vac to help the pt from draining too fluid and help with the healing development. The wound care team also did a great job on patient education and explaining the steps.</p>	<p>Step 6 Action Plan Overall, I think this was a great way to learn about wound vacs and to see how the overall process in placing one. Getting to see how to place the foam and how to seal it was very well done.</p>
