POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
<p>What feelings did you experience in clinical?</p> <p>Why?</p>	<p>During Sim before my scenario I felt very worried as I did not know what to expect. However, during my TPCN I felt very confident in knowing my IUR. But, during my scenario I was nervous due to not knowing if I was supposed to follow the physician orders.</p>
<p>What did you already know and do well as you provided patient care?</p>	<p>I knew and did my IUR really well. As soon as I heard there were decels and mom was not feeling well we stopped the oxytocin, turned on IV bolus, gave 10LNRB, and turned mom.</p> <p>I also caught on to mom changing cat litter & educated importance of mom not doing that.</p>
<p>What areas do you need to develop/improve?</p>	<p>I need to improve on how to communicate during hard topics such as the mom's stillbirth and thinking she was to complain.</p>
<p>What did you learn today?</p>	<p>I learned that it is very important to check ID even though they are already in the room as an extra security for both mom and baby.</p>
<p>How will you apply what was learned to improve patient care?</p>	<p>I will apply the importance of quick responses to improve care as situations like decels are life threatening & need to be caught and treated as soon as possible.</p>
<p>Please reflect on how your OB simulation learning experience assisted in meeting 2-3 of the Student Learning Outcomes.</p>	<ol style="list-style-type: none"> <li data-bbox="560 1396 1534 1522">1. <u>Clinical Judgement</u> - I demonstrated clinical judgement by deciding to not increase oxytocin from 40 as there were fetal late decels and would put mom & baby at risk for demise. <li data-bbox="560 1575 1534 1753">2. <u>Patient centered Care</u> - one scenario was adamant on having a VB birth and the TPCN was reassuring her they would try everything they could to have that happen. Also, explained the possibility & why she may need to have C-section. <li data-bbox="560 1764 592 1795">3.
