

The reason I would like to become a nurse is because I love caring and helping others. I love the rewarding feeling after making someone feel better even by doing something simple for them like even taking them a cup of coffee. I want to be able to care for patients and give them physical and emotional support. As a nurse I want to be able to educate not only the patient but also their family members. I would like to learn as much as possible in the nursing field and try to make a difference in the patient's life. By doing my job as a nurse, I want to be able to help them heal and if they are not able to heal, I want to be able to give emotional support to the family members. I also want to become a nurse to be able to better my future and the future of my family. I will work hard to be able to achieve my goal of becoming a nurse.
