

## IM7 Patient Prioritization Simulation

SIMULATION INFORMATION
Clinical attire required
Review all of the learning guides for this simulation
Bring your laptop or tablet
Print 1 copy paperwork
HESI login

SCHEDULE	
1000-1030	Prebrief & Preparation ALL
1030-1115	Scenario Simulation Groups
1115-1200	Debrief Scenarios Groups
1200-1245	Debrief ALL
1245-1300	Self Reflection & REDCap

GROUP ASSIGNMENTS		
GROUP 1	GROUP 2	GROUP 3
Bororio, Ivy	Herrera, Leticia	Purser, Inna
Bororio, Victoria	Herrera, Lindsey	Rodriguez, Dacia
Campbell, Kylee	Landsman, Hannah	Romero, Mahalei
Cardenas, Gillian	Link, Aaron	Solis, Daniella
Castro, Heidi	Lopez, Isaias	Westbrook, Langston
Garcia, Mariah	Marinelarena, Gabriela	Winn, Scotlynn
Gomez, Celeste	McCormack, Lindsey	Wood, Mayci
Hall, Renee	Mims, Shamari	Zhai, Hongliang
Herbert, Kavlee	Munoz Vicil, Marian	

<p style="text-align: center;"><b><u>SIMULATION PREPARATION:</u></b></p> <p>Recommended review of the following Clinical Skills</p> <p>These items can be found in HESI Clinical Skills:</p> <p style="padding-left: 40px;">Essentials collection</p> <p style="padding-left: 40px;">Respiratory collection (R)</p> <p style="padding-left: 40px;">Perioperative collection (P)</p>	Focus Area	Name of skill in HESI Clinical Skills
	Care of the Surgical Patient	Assessment postoperative respiratory status (P) Incentive spirometry (R) Providing postoperative care Teaching postoperative exercises Using sequential compression device Using wound drainage systems
	Medication Administration	Administering intramuscular injections Administering IV medications by piggyback Administering oral medications Administering subcutaneous injections Drawing up more than one type of insulin Documenting medication administration Preparing and administering insulin Preparing injections from a vial
	Skin & Wound Care	Assessing wounds Changing a dressing Irrigating wounds
	Vital Signs	Assessing respiration: rate, rhythm, and effort Assessing pain Managing pain

Date: Today, Thursday	You will be assigned a patient which your faculty will review the SBAR.
Time: 0700	Login to HESI and go to Simulation Learning System.
	You will have 30 minutes to prepare the paperwork for your assigned patient.
	Debriefing will occur at the end of the scenario and as a large group.
	You will complete the reflection after the large group debrief.

**IM 7 Clinical Judgment Patient Packet - Prioritization Simulation**

Rev 10/2024 DS

**RECOGNIZING CUES**  
Identify relevant and important information from different sources.

Diagnosis/Current Problem and when it started:	Code Status: Full DNR	Weight
Medical History (Allergies):	O2 Therapy (Type and current FIO2)	Height
Patient Story: What happened and why is the patient here?	IV Site(s) (Dates placed and dressing changed)	
	Tubes (Drains, urinary or bowel catheters)	
	Therapies: RT/OT/PT(What are the recommendations?)	
PRIORITY Body System/Concept to Assess:		

Explain the pathophysiology of your patient's current problem in your own words. Describe the concept associated with the pathophysiology.	
Pathophysiology of current problem in your own words.	What do you expect to see with your patient?

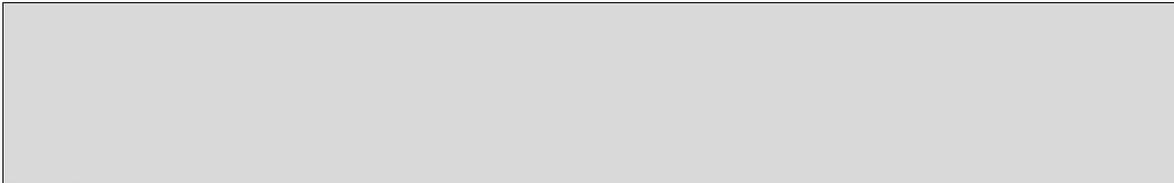

Abnormal Applicable Lab Tests	Current Lab	How does this affect your patient?

**ANALYZING CUES & GENERATING SOLUTIONS**  
Organize and link the recognized cues to the patient's clinical presentation.  
Identifying expected outcomes and defining a set of interventions for the expected outcomes.

What are the major things going on with your patient?	   
What do you want to do for this patient?	   
Why do you want to do these things? How will they help your patient?	   
If a complication develops, what nursing intervention(s) will be implemented?	   

**Patient Centered Care: Psychosocial and Holistic Care: Answer the following questions.**

What is the patient and/or family likely experiencing or feeling during this medical situation?	   
How can you engage with the patient's/family's current experience and show compassion towards them?	   

**Teaching Priorities:** Identify 2 (two) priority teaching topics related to the nursing interventions.

Education topics	Why is this relevant?	How will you present/teach the material?
1.	1.	1.
2.	2.	2.

**TAKING ACTION**  
Performing the solution(s) that address the highest priorities (interventions, medications).

**PHARMACOLOGY**  
List each medication for your patient.

Time Due	Medication Name & Dose	How does this medication work?	What should you watch your patient for?

**EVALUATION**  
Comparing observed outcomes against expected outcomes.  
Complete this section after the scenario debrief with your patient.

Has your patient's overall status made an improvement, declined, or remained unchanged during your shift? What other interventions must be considered by the nurse at this time to continue to help the patient improve?	
Status of patient	
Additional Interventions you would add	
Rationale for additional interventions	

**Prioritization Simulation Reflection**  
This exercise strengthens your clinical judgment skills.  
Reflect on your clinical day and the decisions you made with prioritizing patient care.

Reflection Questions	Student Nurse Reflection
What feelings did you experience in clinical today? Why?	
What did you already know and do well as you provided patient care today?	
What areas do you need to develop or improve?	
What did you learn today?	
How will you apply what was learned to improve your patient care?
