Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I participated in drawing blood to test for sexually transmitted infections in patients.

2. What was the best/most interesting part of the experience?

One of the most interesting experiences I had at the clinic was getting to tour the lab and see how they test for different STD's.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would consider working in a community nursing position because I think it would be a great way to give back to the community.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I believe the STD clinic serves the community very well because they offer multiple resource for people such as testing and treatment for STD's. They also offer vaccinations for all ages.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witnessed patient teaching by the nurses explaining the importance of practicing safe sex to prevent STD's. They also taught the community that it is important if the patient tests positive for an STD, that their partner should also get tested and treated for the infection.
