**POST-CLINICAL REFLECTION OB Simulation Reflection - due on Thursday by 2359**

To strengthen your clinical judgment skills, reflect on your knowledge and the decisions made caring for this patient by answering the reflection questions below.

Reflection Question	Nurse Reflection
<p>What feelings did you experience in clinical?</p> <p>Why?</p>	<p>Excited, a little nervous, but overall great. It was a good learning experience even watching the other scenarios, but it taught awareness and quickness in implementing interventions.</p>
<p>What did you already know and do well as you provided patient care?</p>	<p>Feed baby, give glucose water, check glucose to see if any improvement and get his jitteriness, hypotonia, and skin color to improve, place baby under warmer to hopefully get temp. up.</p>
<p>What areas do you need to develop/improve?</p>	<p>More confidence in myself, paying attention to other people that may be in the room, and making decisions based on what is going on at the time and how to improve them.</p>
<p>What did you learn today?</p>	<p>How to implement different plans of care when an intervention was not successful.</p>
<p>How will you apply what was learned to improve patient care?</p>	<p>Continuing to evaluate the problem(s) and being more aware of the surroundings and paying closer attention to body language.</p>
<p>Please <b>reflect</b> on how your OB simulation learning experience assisted in meeting 2-3 of the <b>Student Learning Outcomes</b>.</p>	<ol style="list-style-type: none"> <li>1. Safety &amp; Quality- I would have been a little more aware of the family member and the signs she was giving off to have been alarming.</li> <li>2. Clinical Judgement- Using what I new to take care of baby while trying to implement a plan when things would not work on what intervention to do next.</li> <li>3.</li> </ol>
