

Student Name Noe Tyenna

Date: 4/10/24

Instructional Module 6: Obstetrics Community Clinical Experience

Community Site: Dr. Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? I was able to watch numerous amounts of ultrasound and aid in obtaining fetal heart rates. I was also able to watch a assessment of the cervix as the pap smear previously was abnormal.
2. What was the best/most interesting part of the experience? watching the 3d scan of the baby through the ultrasound, Fascinating how you could see every individual part.
3. Is a community nursing position something that you would consider working in? Why or why not? I do not see myself working here due to the fact I am a man. It puts women in a vulnerable situation and I don't feel as my presence would ease a already high stress environment.
4. Do you feel like this community site met the needs of the population they serve? Why or why not? yes they made the women feel safe and the staff were very knowledgeable about everything that takes place.
5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not? The general teachings were more or less the same such as fetal movement and b/s that are concerning. The teaching was great from Dr. Blann to his whole staff.

| IM6 Student Learning Outcomes | | | | |
|--|--|--|--|---|
| Safety & Quality | Clinical Judgment | Patient Centered Care | Professionalism | Communication & Collaboration |
| <i>Formulate a plan of care for the childbearing family, and the patient with mental health disorders using evidence-based practice, safety, and quality principles.</i> | <i>Demonstrate clinical judgment using evidence-based data in making clinical decisions for the childbearing family, and the patient with mental health disorders.</i> | <i>Demonstrate family centered care based on the needs of the childbearing family, and the patient with mental health disorders.</i> | <i>Relate knowledge, skills, and attitudes required of the professional nurse by advocating and providing care to the childbearing families, and the patient with mental health disorders.</i> | <i>Communicate and collaborate effectively with patients, family, and members of the interdisciplinary team in the childbearing family, and the patient with mental health disorders.</i> |

Safety & Quality:

Clinical Judgment:

Patient Centered Care:

helped distract patients other children while also bringing water to patient when needed.
